DETAILED ACTION

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Michael H. Trenholm on 4-11-06.

The application has been amended as follows:

In claim 7, line 2, "hand-held fluorescent" has been replaced with --portable--.

In claim 10, line 3, "multiple" has been replaced with --pair of--;

line 4, "multiple" has been replaced with --pair of twin tube--;

line 7, "multiple fluorescent" has been replaced with --pair of twin tube PL fluorescent--;

line 7, "multiple switches" has been replaced with --switch assembly--;

line 10, "the multiple" has been replaced with --the pair of--;

line 10, "including multiple twin tube PL lams" has been replaced with --including a pair of twin tube PL fluorescent lamps--;

line 13, "pace" has been replaced with --space--;

line 15, "multiple" has been replaced with --pair of twin tube--; and

line 17, "switches" has been replaced with --switch assembly--

Art Unit: 2821

In claim 11, lines 1 and 2, "the multiple twin tube PL fluorescent lamps comprise two twin tube PL fluorescent lamps and" has been deleted; and

line 3, "the two twin tube" has been replaced with --the pair of twin tube--.

Claim 14 has been canceled.

The amendments have been made to correct minor informalities and further eliminate lack of antecedent basis.

Allowable Subject Matter

2. Claims 1, 2 and 4-13 are allowed.

3. The following is an examiner's statement of reasons for allowance: It is agreed that the prior art of record fail to teach or suggest alone or in combination, a portable lamp assembly including the combination of the limitations: "multiple switches (switch assembly) coupled to the multiple (pair of) twin tube PL fluorescent lamps respectively, wherein the multiple switches (switch assembly) control the multiple PL fluorescent lamps independently and a ballast circuitry configured to generate regulated power, wherein the regulated power is selectively provided to the multiple (pair of) twin tube PL fluorescent lamps by the multiple switches (switch assembly) wherein the ballast circuit is a solid state ballast circuit that includes at least one pair of oscillating transistors that are adapted to provide regulated power to start and operate the multiple (pair of) twin tube PL fluorescent lamps including multiple (pair of) twin tube PL lamps with integral starters" in a manner claimed in claims 2 and 10. It is for these reasons in combination with all the other limitations in the independent claims 2 and 10, and in light of the terminal disclaimer filed on 2-08-06 that claims 2, 4-9, and 10-13 are allowable over prior art of record.

Art Unit: 2821

Conclusion

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
